PROFILE

Frontend developer with 4+ years of experience. Primary focus: Vue 2/3, Nuxt 3, React, and Next.js. I build SSR applications with complex business logic, including booking flows, dynamic pricing, catalogs, and customer portals.

Experienced in frontend architecture, API integration, testing, and CI/CD. I have launched projects from scratch, mentored junior developers, and collaborated closely with PMs, QA engineers, designers, and backend teams.

I use AI tools in daily development, including Codex, Cursor, Claude Code, MCP, and API models for automation and product AI features.

WORK EXPERIENCE

Frontend Developer - TrustyOne

April 2024 - February 2026 · Middle → Middle+

Full-cycle agency serving the travel and event industries, with parallel delivery across multiple client projects.

- Designed frontend architecture and launched projects from scratch, defining the stack, application structure, and quality standards.
- Mentored two junior developers through task allocation, code reviews, and backlog prioritization.
- Introduced a Unit / Integration / E2E testing strategy with Playwright and Vitest, improving release stability.
- Configured CI/CD and automated deployment scripts in Bitbucket Pipelines and GitLab CI for dev and production environments.
- Worked directly with QA, PMs, clients, and designers to clarify requirements and reduce rework after reviews.
- Proposed technical solutions for business requirements and aligned architecture, timelines, and integration constraints.
- Improved Lighthouse metrics, Core Web Vitals, SEO, and server-side image processing.
- Defined API contracts with backend teams, accelerating integrations and stabilizing releases.

KEY PROJECTS

DLI (Deluxe Limo Italy) - TravelTech platform for booking transfers and tours in Italy. Built a multi-step booking flow with Vue 3 / Nuxt 3, SSR, Stripe, Zoho CRM, dynamic pricing, and documented business logic. Designed a multi-brand architecture where one codebase serves three brands through environment configuration.

Inspiritaly - TravelTech platform for selecting and customizing tours in Italy, built with Nuxt 3, SSR, and Pinia. Developed a tour builder with activities and add-ons, group pricing for up to eight participants, duration and transfer rules, service availability, catalog filters, and adaptive media galleries.

Eventner - EventTech venue marketplace with search, filtering, venue pages, online booking, and SEO-oriented landing pages. Implemented a FullCalendar-based interactive calendar, reusable SEO module, PWA support, and server-side image optimization with sharp.

Travel 2025 - Mobile-first platform for an international tourism forum featuring an interactive map, activity program, participant and discount catalogs, quests, personal routes, and client-side PDF export.

Frontend Developer - Paleo studio

November 2022 - January 2024 · Junior → Middle

Studio delivering a wide range of client projects, from promotional websites to internal business applications.

- Logistics platform - built a logistics management interface with Vue 2 and Vuetify.
- Silk Way Rally customer portal - developed an interactive participant interface with dynamic tables and charts.
- Nightclub information portal - delivered a responsive, SEO-optimized website.
- Journalism website - built a content constructor for the administration panel.
- Browser extension - automated the preparation of cover letters for job applications.

Frontend Developer - Freelance

June 2021 - August 2022 · Freelance

Developed and maintained client web applications and landing pages with React, Next.js, and TypeScript for small businesses and private clients.

- Created responsive interfaces and reusable components; configured SSR/SSG and routing in Next.js.
- Integrated REST APIs, forms, and validation; managed server and client state with React Query and Zustand.

SKILLS

Core stack: Vue.js 3 (Composition API, Script Setup), Nuxt 3 (SSR/Hybrid), Vue.js 2; React, Next.js (App Router); TypeScript, JavaScript ES6+

React / Next.js: Server Components, Client Components, React Hook Form, TanStack Query, Zustand, Zod

Backend / API: Node.js, Express; RESTful API, Swagger, Postman

UI and styling: Tailwind CSS v3/v4, CSS Modules, styled-components, SCSS, PostCSS, PrimeVue, Vuetify, Swiper.js, Quasar, Inspira

Build and infrastructure: Vite, Webpack, Git, Docker, Bitbucket Pipelines, GitLab CI, PWA

Maps and visualization: Mapbox GL JS, Google Maps API, Yandex Maps API

State and routing: Pinia, Vuex, Vue Router, VueUse

Testing and quality: Playwright, Vitest, Jest, React Testing Library, Vue Test Utils; ESLint, Prettier, Husky, lint-staged

Forms and security: VeeValidate, Yup, Zod; DOMPurify

Integrations: Stripe, Zoho CRM API, FullCalendar

Performance and monitoring: Core Web Vitals, Lighthouse, nuxt-vitalizer, sharp, Sentry, Yandex Metrica

AI tools: Codex, Cursor, Claude Code, MCP, Ollama; Gemini API and OpenAI API

Languages: Russian - native; English - A2 (basic)
