

Rinat Razhapov

Frontend Developer

rinni499@gmail.com | tg: [@r33n_dev](#) | [github](#) | [linkedin](#) | [gitlab](#)

Summary

Frontend Developer with 3+ years of commercial experience specializing in the Vue 3 / Nuxt 3 ecosystem. Focused on building scalable applications with complex business logic and high-load performance.

- **Business-Oriented Approach:** I don't just write code; I dive deep into the product to deliver technical solutions that boost conversion and performance. Experienced in developing complex dynamic pricing calculators with multiple variables (tariffs, logistics, markups).
 - **Engineering Culture:** Advocate for strict typing (TypeScript) and ensuring stability through automated testing (Playwright, Vitest). Successfully optimize projects across all Core Web Vitals metrics.
 - **AI-Driven Development:** Actively integrate modern development tools (Cursor, MCP) to accelerate routine tasks. Configure project-specific rules (.cursor/rules) to maintain unified code standards, auto-generate tests, and ensure team adherence to architectural patterns.
-

Key Achievements

Architecture Design: Experienced in launching projects from scratch, including tech stack selection, infrastructure setup, and laying a scalable foundation.

Quality & Stability: Implemented a comprehensive testing strategy (Unit, Integration, E2E) using Playwright and Vitest, which significantly reduced production bugs.

Mentorship & Leadership: Mentored Junior developers, managed task distribution within the team, and prioritized the backlog.

Performance & SEO: Conducted deep project optimization, achieving high scores across all 4 Core Web Vitals metrics (Performance, Accessibility, Best Practices, SEO).

TypeScript Migration: Successfully migrated a codebase to TypeScript, ensuring strict typing and reducing runtime errors.

Work Experience

Paleo studio

November 2022 - January 2024

- **Logistics Platform:** Developed a frontend interface for logistics management using Vue 2 and Vuetify.
- **Silkway Rally User Dashboard:** Created an interactive interface for participants featuring dynamic tables and charts.
- **Night Club Information Portal:** Built an adaptive, SEO-optimized website.
- **Journalism Website:** Developed a content builder for the admin panel.
- **Browser Extension:** Created an extension to automate cover letter generation for job applications.

TrustyOne

April 2024 - February 2026

Development and implementation of full-cycle web solutions for the tourism and event sectors.

Key Projects:

- DLI (Deluxe Limo Italy) — A TravelTech online booking platform for transfers and tours across Italy: implemented a multi-step booking flow, integrated Stripe and Zoho CRM, and developed complex dynamic pricing logic.
- Eventner — An EventTech marketplace for venues (banquet halls/lofts): built search and filtering systems, venue cards, online booking flows, and SEO-oriented pages.
- Inspiritaly — A TravelTech platform for exclusive tours and experiences in Italy: developed the catalog, tour cards, shopping cart, checkout, user dashboard, and optimized Core Web Vitals alongside SSR/ISR behavior.
- Travel 2025 — A mobile-first EventTech platform for an international tourism forum: built an interactive map, activity schedule, attendee and discount catalogs, quests, and custom itinerary builders.

Responsibilities & Impact:

- Designed frontend architecture and launched projects from scratch (tech stack, structure, quality standards).
- Collaborated closely with the backend team: designed API contracts, accelerated integration, and stabilized releases.
- Advanced engineering practices: implemented strict typing, comprehensive testing (unit/E2E), linting/formatting, and CI/CD.
- Maintained product focus: aligned technical decisions with business metrics (conversion, performance, UX for mobile scenarios).

Skills

Core Technologies:

- Frameworks: Vue.js 3 (Composition API, Script Setup), Nuxt 3 (SSR/Hybrid), Vue.js 2, React, Express
- Languages: TypeScript (strict typing), JavaScript (ES6+), Node.js
- State Management: Pinia (migration experience), Vuex, Redux

Tools & Infrastructure:

- Build Tools: Vite (advanced configuration and bundle optimization), Webpack
- Integrations: Stripe, Zoho CRM API, RESTful API, Swagger, Postman
- Other: Git (GitHub/GitLab Flow), Docker, Bitbucket Pipelines (CI/CD), PWA, PDF generation, Figma, Telegram bots

Testing & Quality:

- Testing: Playwright (E2E and visual regression testing), Vitest, Jest
- Monitoring & Metrics: Sentry, Yandex Metrika
- Code Quality: ESLint, Prettier, Husky, Lint-staged

UI & Styling:

- Styling: Tailwind CSS (v3/v4), SCSS, PostCSS, CSS Modules
- Component Libraries: PrimeVue, Vuetify, Swiper.js, Quasar, Inspira
- Visualization & Maps: Mapbox GL JS, Google Maps API, Yandex Maps API, FullCalendar
