ABOUT

Frontend developer with 3+ years of commercial experience, specialising in the Vue 3 / Nuxt 3 ecosystem. Focused on building scalable applications with complex business logic and high load.

Business focus

I don't just write code — I dig into the product to ship technical solutions that lift conversion and performance. Experienced in building complex dynamic pricing calculators with many variables (tariffs, logistics, markups).

AI-driven development

I treat AI as a working tool, not hype: Cursor and MCP are part of my everyday pipeline. I set up project rules (.cursor/rules) to enforce shared code standards, auto-generate tests and keep architectural patterns consistent across the team.

Engineering culture

An advocate of strict typing (TypeScript) and of stability through automated testing (Playwright, Vitest).

Consistently optimise projects across all Core Web Vitals metrics.

Architecture design

Experienced in launching projects from scratch: choosing the tech stack, setting up infrastructure and laying a scalable foundation.

ACHIEVEMENTS

Quality and stability. Introduced a comprehensive testing strategy (unit, integration, E2E) with Playwright and Vitest, which cut the number of production bugs.

Performance and SEO. Ran deep optimisation of projects, reaching high scores across all four Core Web Vitals metrics (Performance, Accessibility, Best Practices, SEO).

Mentoring and leadership. Guided the growth of junior developers, distributed tasks within the team and prioritised the backlog.

TypeScript migration. Migrated the codebase to TypeScript, enforcing strict typing and reducing the likelihood of runtime errors.

EXPERIENCE

TrustyOne

April 2024 — February 2026

Building and delivering full-cycle web solutions for the travel and event sectors.

KEY PROJECTS

DLI (Deluxe Limo Italy) — TravelTech platform for online booking of transfers and tours across Italy: multi-step booking flow, Stripe and Zoho CRM integrations, complex dynamic pricing logic.

Eventner — EventTech marketplace of event venues (banquet halls / lofts): search and filtering, venue cards, online booking scenarios, SEO-oriented pages.

Inspiritaly — TravelTech platform for exclusive tours and experiences in Italy: catalogue, tour page, cart, checkout, user account, Core Web Vitals and SSR/ISR optimisation.

Travel 2025 — mobile-first EventTech platform for an international travel forum: interactive map, activity programme, exhibitor and discount catalogues, quests and personal route building.

SCOPE AND CONTRIBUTION

Frontend architecture design and launching projects from scratch (stack, structure, quality standards).

Close work with the backend team: API contract design, faster integration and more stable releases.

Paleo studio

November 2022 — January 2024

- Logistics platform — logistics management interface built with Vue 2 and Vuetify.
- Silkway Rally user account — interactive interface for participants with dynamic tables and charts.
- Nightclub information portal — responsive, SEO-optimised website.
- Journalism website — content builder for the admin panel.
- Browser extension — automated generation of cover letters for job applications.

SKILLS

Core technologies	Frameworks: Vue.js 3 (Composition API, Script Setup), Nuxt 3 (SSR/Hybrid), Vue.js 2, React, Express Languages: TypeScript (strict typing), JavaScript (ES6+), Node.js State management: Pinia (migration experience), Vuex, Redux
AI tools	Cursor, MCP (Model Context Protocol), Claude, automation and text generation via the Gemini API
Testing and quality	Testing: Playwright (E2E and visual regression testing), Vitest, Jest Monitoring and metrics: Sentry, Yandex Metrica Code hygiene: ESLint, Prettier, Husky, Lint-staged
Tooling and infrastructure	Build: Vite (advanced configuration and bundle optimisation), Webpack Integrations: Stripe, Zoho CRM API, RESTful API, Swagger, Postman Other: Git (GitHub/GitLab Flow), Docker, Bitbucket Pipelines (CI/CD), PWA, PDF generation, Figma, Telegram bots
UI and styling	Styling: Tailwind CSS (v3/v4), SCSS, PostCSS, CSS Modules Components and libraries: PrimeVue, Vuetify, Swiper.js, Quasar, Inspira Data viz and maps: Mapbox GL JS, Google Maps API, Yandex Maps API, FullCalendar

PET PROJECTS WITH AI INTEGRATION

Browser extension for automated job applications with generated cover letters · converter of Figma designs into Vue components · CRM with automated replies via the Gemini API
