PROFILE

Frontend Developer with 3+ years of commercial experience, specializing in Vue 2/3 and Nuxt 3. I build SSR applications with complex business logic, including booking flows, dynamic pricing, catalogs, and customer dashboards.

Beyond UI development, I contribute to architecture design, API integration, testing, and CI/CD. Experienced in launching projects from scratch, mentoring junior developers, and collaborating with PMs, QA engineers, designers, and backend teams.

I use AI tools in day-to-day development, including Cursor, Claude Code, MCP, and API-based models for automation and product AI features.

EXPERIENCE

Frontend Developer — TrustyOne

April 2024 — February 2026 · Middle → Middle+

Full-cycle agency serving the travel and event industries, with parallel delivery across multiple client projects.

- Designed frontend architecture and launched projects from scratch, defining the stack, application structure, and quality standards.
- Mentored 2 junior developers through task allocation, code reviews, and backlog prioritization.
- Introduced a Unit / Integration / E2E testing strategy with Playwright and Vitest, improving release stability.
- Set up CI/CD pipelines and automated deployment scripts with Bitbucket Pipelines and GitLab CI for dev/prod environments.
- Worked directly with QA, PMs, clients, and designers to clarify requirements before development and reduce rework after reviews.
- Proposed technical solutions aligned with business requirements.
- Aligned architecture, timelines, and integration constraints for new projects with PMs before development started.
- Optimized Lighthouse scores across Performance, Accessibility, Best Practices, and SEO, as well as Core Web Vitals.
- Refined API contracts with the backend team, accelerating integration and improving release stability.

SELECTED PROJECTS

DLI (Deluxe Limo Italy) — TravelTech platform for booking transfers and tours across Italy. Built a multi-step booking flow with Vue 3 / Nuxt 3 SSR, Stripe, and Zoho CRM; implemented dynamic pricing and documented business logic. Designed a multi-brand architecture that serves 3 brands from one codebase through environment configuration. Documented the Lead → Deal → Payment flow and abandoned-cart recovery branch.

Inspiritaly — TravelTech platform for discovering and customizing tours in Italy, built with Nuxt 3 SSR and Pinia. Developed a tour builder with activities and add-ons, group pricing for up to 8 participants, duration and transfer calculations, and availability rules. Implemented the catalog, filters, and responsive media galleries.

Eventner — EventTech venue marketplace with search and filtering, venue cards, online booking, and SEO-focused pages. Implemented an interactive FullCalendar schedule, a reusable SEO module, PWA support, and server-side image optimization with sharp.

Travel 2025 — Mobile-first platform for an international travel forum, featuring an interactive map, activity schedule, participant and discount catalogs, quests, personalized routes, and client-side PDF export with html2canvas and jsPDF.

Frontend Developer — Paleo studio

November 2022 — January 2024 · Junior → Middle

Studio delivering a wide range of client projects, from promotional websites to internal business tools.

- Logistics platform — Logistics management interface built with Vue 2 and Vuetify.
- Silk Way Rally dashboard — Interactive participant dashboard with dynamic tables and charts.
- Nightclub information portal — Responsive, SEO-optimized website.
- News website — Content builder for the administration panel.
- Browser extension — Automated generation of tailored cover letters for job applications.

SKILLS

Core: Vue.js 3 (Composition API, Script Setup), Nuxt 3 (SSR/Hybrid), Vue.js 2; TypeScript, JavaScript ES6+
Backend / API: Node.js, Express; RESTful API, Swagger, Postman

UI and styling: Tailwind CSS v3/v4, SCSS, PostCSS, CSS Modules; PrimeVue, Vuetify, Swiper.js, Quasar, Inspira
Build and infrastructure: Vite, Webpack, Git, Docker, Bitbucket Pipelines, GitLab CI, PWA

Maps and visualization: Mapbox GL JS, Google Maps API, Yandex Maps API

Data export: html2canvas, jsPDF, PDF generation

Additional: React and Next.js — basic proficiency

Languages: Russian — native; English — A2 (basic)

State and routing: Pinia, Vuex, Vue Router, VueUse

Testing and quality: Playwright (E2E and visual regression), Vitest, Vue Test Utils, Jest; ESLint, Prettier, Husky, lint-staged

Forms and security: VeeValidate, Yup, Zod; DOMPurify

Integrations: Stripe, Zoho CRM API, FullCalendar

Performance and monitoring: Core Web Vitals, Lighthouse, nuxt-vitalizer, sharp, Sentry, Yandex Metrica

AI tools: Cursor, Claude Code, MCP, Ollama; Gemini API and OpenAI API

Pet projects: AI-assisted job applications; Figma → Vue converter; CRM with Gemini-powered replies
